Services

INTRODUCTION AND MISSION

Our goal is to keep the medical part
of the Immigration process
simple and transparent.

Our approach thus is clear and lays out
all involved costs with no hidden charges.

To make the process simple, we have an
on-site lab at the office for blood and
urine tests

What to Bring to the appointment?

§ Form I-693 (<https://www.uscis.gov/sites/default/files/document/forms/i-693.pdf>)

§ In the Form I-693, fill out “Part 1. Information About You”. Do not sign the form until the civil surgeon tells you to sign it. You must sign in the presence of the civil surgeon.

§ Government-issued photo identification, such as a valid passport or driver’s license.

§ Report of previous Medical Examination if available.

§ Vaccination or immunization record (such as DT, DTP, DTaP, Td, Tdap, OPV, IPV, MMR, Hib, hepatitis A, hepatitis B, varicella, pneumococcal influenza, rotavirus and meningococcal disease) if available.

§ Payment (Credit card or Cash are both acceptable at our location).

The Immigration Physical Exam

THE EXAM

Immigration Physical Exam and Mental Status Evaluation by the Civil Surgeon are conducted at our office. Same day appointments are available by calling our office at (281) 240-0311

LABS

You do not need to be fasting for blood/urine tests. Adults (above age 15) are required to have:
A serologic blood test for Syphilis (RPR)
Tuberculosis blood test (IGRA test) - Ages 2 and above.
Neisseria Gonorrhoea Urine test
Proof of vaccinations or blood test showing immunity.
Most will require proof of vaccination for Tetanus-Diphtheria Td, Measles, Mumps, Rubella and Varicella (Chicken Pox)

VACCINATIONS

If you have no proof of vaccinations or blood tests to prove immunity, you will need to get vaccinations as determined by the Civil Surgeon. Our office can help you with locations for vaccinations that are appropriate for your age. You will then proceed to a location of your choice and receive vaccinations and bring evidence of vaccination back to the office. The cost of vaccinations is not included in the price of the exam and is payable directly to the vaccination provider.

Returning to the Office

As a final step, you will need to return to the office in approximately 7-10 days. This time period will allow for test results to come back and vaccinations to be taken. During this visit, the doctor will complete Form I-693 and seal the form in an envelope for you to submit to USCIS and provide you a copy for your personal records. Please note that USCIS will not accept the form if the envelope has been opened or altered.

**TRANSPARENT PRICING
NO HIDDEN COSTS**

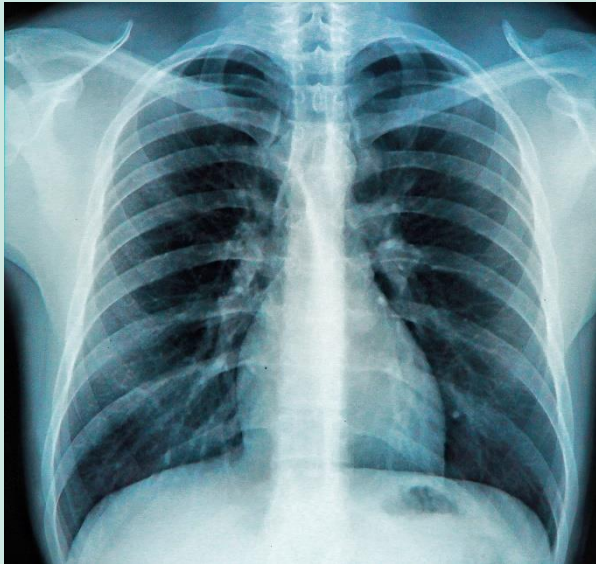

Total Cost (excluding vaccinations): \$350

Services included in the total cost above:

- § Immigration Physical Exam (covers the exam and cost of filling up form I-693)
- § TB testing (IGRA blood test)
- § Syphilis testing (ages 15 and above)
- § N. Gonorrhea testing (ages 15 and above)
- § Varicella immunity (chicken pox) titers (if you have had a history of chicken pox)
- § Urine Drug Screening (only if required)

IMPORTANT CONSIDERATIONS

What if Quantiferon is Positive?

As per CDC guidelines, a positive Quantiferon test will need a Chest X-ray to be done and a mandatory report to State Health Services will have to be made. If the chest x-ray is normal, this should not impact the Immigration process.

Could I need other treatment?

Yes. If the other tests for Syphilis or Gonorrhea are positive, you may be referred for treatment before the Immigration paperwork can be advanced.

U.S. Citizenship
and Immigration
Services

At Sugar Land Internal Medicine, we understand the importance and precise nature of the Immigration process. We pay extreme attention to the paperwork as any errors can delay the process for you.
